^{***}p < 0.001, **p < 0.01, *p < 0.05

Standard errors clustered by local authority district. Inequality ranges from zero (lowest level of inequality) to one (highest level of inequality). High income is a dummy variable coded as one if respondent's gross annual household income exceeds £70,000. Low income is a dummy variable coded as 1 if respondent's gross annual household income is less than £15,000.
